

TOWN OF FORT MILL

May 20, 2016

RE: Water Quality for January 1, 2015 to December 31, 2015 as provided to Town of Fort Mill by City of Rock Hill

The Town of Fort Mill, as required by the Safe Drinking Water Act, is providing the 2015 water quality data of regulated and unregulated contaminants detected in the City of Rock Hill's source water. The Town through contractual arrangements purchases its drinking water from the City of Rock Hill. The United States Environmental Protection Agency mandates that the Town furnish this list of contaminants to our master meter customers annually.

We are pleased to report that the water provided by the Town of Fort Mill met all water quality standards in 2015. If you have any questions concerning this data, please feel free to contact me at 803-547-7158.

Sincerely,

Davy Broom
Public Works Director
